

# Homework 6

2017141493004 常家奇

The abstract common services tactic is intended to reduce coupling, but it also might reduce cohesion. Why?

使用抽象通用服务确实可以降低耦合,但使用抽象通用服务策略是将模块的共性抽象出来成一个抽象模块,对于每个模块特有属性的支持会变少,所以降低了内聚.

Write a set of concrete scenarios for performance using each of the possible responses in the general scenario

Source	Stimulus	Artifact	Environment	Response	Response Measure
Users	Initiate Transacations	System	Normal Operation	Transactions are processed	Average Latency of Two Seconds
